**EXAMINER'S AMENDMENT**

This application is in condition for allowance except for the presence of claims 23-25 which are drawn to a non-elected invention without traverse. Accordingly, claims 23-25 have been cancelled.

**Prior Art Citation**

The Mendenhall ('388) patent is cited to show a hydraulic cutting blade assembly. The Mendenhall ('226) patent is cited to show a hydraulic food cutting apparatus.

**Reasons for Allowance**

The following is an examiner's statement of reasons for allowance. The prior art of record does not show or suggest the food processing system as claimed in claims 1 and 20. The present food processing system comprises a fluid conduit configured for directing the food carried in a fluid medium along a food path; a food inlet operatively associated with the fluid conduit for feeding the food into the conduit; a pump operatively associated with the conduit for pumping the fluid through the conduit in a fluid stream direction; a processor unit associated with the conduit, disposed along the food path, and comprising a tool configured and associated with the conduit for performing a processing operation on the food; and a deceleration element operatively associated with the conduit and configured for decelerating the fluid and carried food

along the food path while maintaining the fluid stream substantially free of recirculation vortices.

***Drawing Objections***

Figures 1-6 are objected to as being informal. New, formal drawings MUST be submitted no later than the payment of the Issue Fee.
